FLP[®]
HOT NEWS

BE MORE CAUTIOUS IF YOU ARE SELECTING WINDOWS PLATFORM.

LINUX IS NOW GETTING MORE AND MORE SUPPORT AND WIDELY USED.

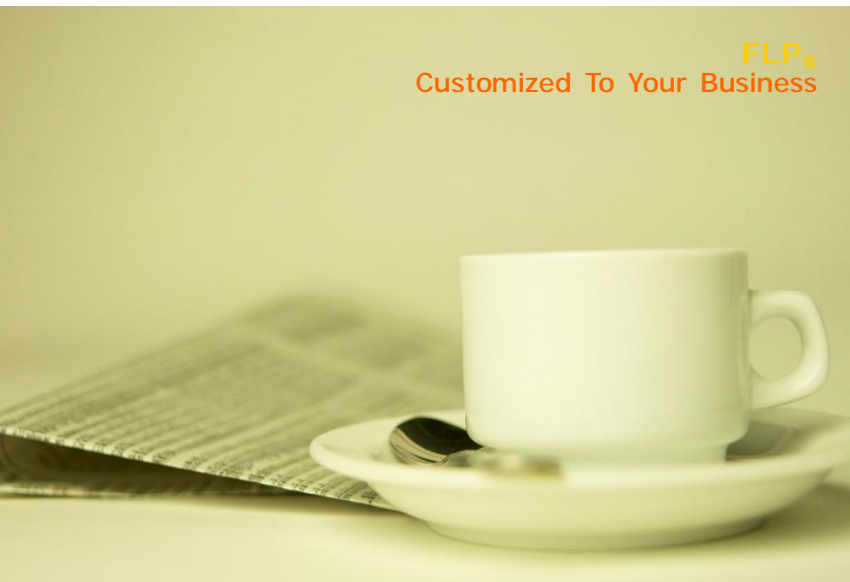

INSTALLATION COST AND MAINTENANCE COST ARE LOW.

[2005-03-06] *FLP Development Team*

Yesterday we had a chance to read the most reputable official magazine of the Hong Kong Institute of Certified Public Accountants, 'The Hong Kong Accountant, February 2005 issue' and felt most excited to concur their professional insight that Linux is the future for its low installation cost and easy maintenance.

LINUX: LOW COST

Recently, Microsoft advertised on several major Hong Kong Newspaper with a chart that Microsoft solution is cheaper solution than Linux solution. We could not agree with Microsoft. We cannot afford to conduct heavy survey or research to prove that Microsoft's advertisement is misleading. At least our company and our major clients are all using Linux solutions. Moreover, our technical business counterparts and friends all agree that Linux is a economical solution.

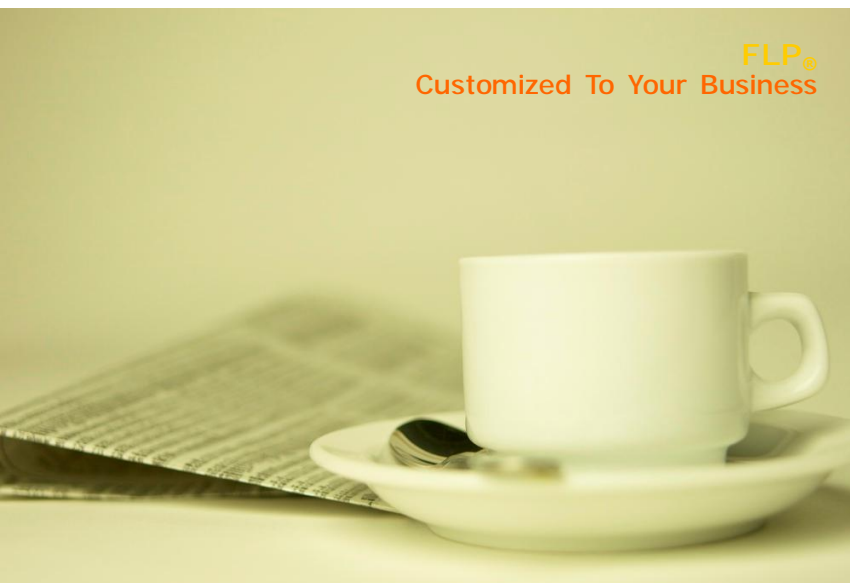

LINUX: STABLE AND RELIABLE

It was true two or three year ago that Linux was not at a right time for implementation. Our technical team and many worldwide IT people knew that Linux would be the future, at least, for the server platform as Linux is open source and as a matter of fact our experience told us that Linux is stable and reliable. Look at the confusing patches and numerous inconsistent updates and you should find users of Microsoft are like fools being dragged on by Microsoft who tell you to go back or front and in many cases Microsoft has serious bugs but they called them 'patch'. Our company is running IBM Lotus/ Domino on Linux and in the last six months, we didn't have system hang even once.

LINUX NOT ONLY FOR SME, ALSO FOR LARGE ENTERPRISES

Again, read the 'Hong Kong Accountant, February 2005 Issue', you will find the professional opinion that Linux should be the choice and Linux is not at all for SME but for large companies alos. It is rather simple to look at IBM which formally exercise large campaign in supporting Linux. Also, both SAP and Oracle now rund on Linux as well. If IBM,SAP and Oracle select Linux, Linux is your choice also. Don't be be distracted by Microsoft advertisements.

USING FLP®

You truly have used next generation technology in achieving today's business success.

FLP®
Customized To Your Business

FLP® BUSINESS MODEL:

A FOUNDATION FOR YOU TO BUILD YOUR OWN BUSINESS MODEL

No two companies are the same even conducting the same business in the same industry. Why should you choose a standard software package.

No other software solutions provide more feature and functions than FLP® does costeffectively. No other software solutions provide such an all-in-one interface integrating with your company wide company business processes. FLP® provides a market leading collaboration platform for all your company staff to work on anytime, anywhere with unlimited scalability without physical country border barriers over the Internet.

What's more, FLP® shares our experience with you to customize the software applications to suit your business and prepare for the future.

FLP® is empowered by IBM® Lotus® Domino®/Notes® technology.
