[2005-03-07] *FLP Division Manager*

Printed circuit board manufacturing is a new business model of FLP[®].

TWO-FOLD BENEFITS

This business solution typically helps you to manage your factory and backoffice wherever you are. When you are in the PRC factory, you can access to the server and get to know the orders, sales and financial information immediatly. Likewise, when you are in Hong Kong, you get control of the logistics and costs information of the PRC factory. Eventually, wherever you are, you control all of your businesses.

Down to the operational level, workflow, quotations, orders and deliveries can be communicated instantly between Hong Kong and China, thus eliminating inefficiency of duplicate records and time to wait.

COSTING SHEETS

This business model lets you quickly formulate costing sheets easily. The advantage is that all your sale staff can instantly get access to the correct costing information and can quote the most competitive price at the shortest time.

INTEGRATION OF BACKOFFICE BUSINESS ROUTINES

All routine documents, e.g. quotations, sales confirmations, delivery notes, packing lists, AWB shipments, sales invoices, purchase orders and RMA are all integrated in one system.

In addition, email and PDF facilities are also the features of FLP® business solutions.
