

EXECUTIVE SUMMARY
FLP[®] ACCOUNTING MANAGER

PROFIT

ARE YOU USING EFFICIENT TOOLS?

Companies, from large to small, whether running a formal accounting department or one person carrying out accounting and administration role, are using accounting software. In realm of technology proclamation, are you compromising your professional practices to suit the technology? Have you ever known that you are still using the backbone design in the 1980s with window-dressing graphic interface? You should now demand to use the innovative FLP[®] Accounting Manager, a human-oriented accounting software tool using next-generation technology.

ACCOUNTANT'S WAY

Few accounting packages understand your needs better than FLP[®] Accounting Manager as it is genuinely developed by professional accountants of extensive international business experience and the experience is transformed into FLP[®] Accounting Manager to be with you, professional accountants too, side by side to accomplish daily works efficiently.

NO UNREASONABLE OVERTIME WORK

Success story of one of our FLP[®] Accounting Manager users reveal the secret of working happily without unreasonable overtime. The secret is with FLP[®] Accounting Manager, things are done once ('Type Once'), retrieval is fast ('Use Many'), and works can be delegated with access right control ('Many Can Use').

CHEQUE AND DOUBLE ENTRIES ONCE AND FOR ALL

Shouldn't you look for a change if your current accounting software requires you to issue cheque through a module and posting is required to generate the debit and credit. As an accountant, are you feeling awkward to follow these additional processes? Using FLP[®] Accounting Manager, issuing cheques and double entries are done once and for all on one screen. Only by seeing can you feel how exciting it is using next-generation technology to achieve today's business success.

NO POSTING, NO MODULE, NO YEAR END CLOSING

FLP[®] Accounting Manager adopts the 'As-a-Whole' approach, requiring no posting, no module or no complicated year end procedures.

DOCUMENT FILING NUMBER AND INTERNAL CONTROL

FLP[®] Accounting Manager helps you strengthen the internal control. You can pre-assign prefixes of various patterns and sequential document numbers will be generated automatically. This document number is essentially both the document identification number and the voucher number. Filing and retrieving are accurate and fast.

SEPARATE FILING CABINET FOR EACH FISCAL YEAR

How often are your accounting documents in the pending tray waiting for data entry? This messy situation is even worse during the first few months of a new fiscal year. Why? You have not 'closed' your accounts yet in your accounting software. FLP Accounting Manager allocates unique cabinets for different fiscal years. The cabinets (technically called database) though physically separate are treated 'As-a-Whole' internally, thus allowing both continuity and separate storage.

HUMAN ACCOUNT NAME AND GROUP

Does it sound familiar '11011', 'E3210586-103' and 'FA10001'? Using FLP Account Manager, you don't need to use codes. You simply use Overseas Travel, Office Equipment, Share Capital, Current Assets and Long-term Liabilities. You can conveniently format your financial statements by selecting and assigning an account name to a group.

MULTI-USER AND SECURITY

FLP Accounting Manager is a collaboration application which naturally supports multi-user. You assign access rights to users. You may even set access rights to menus and buttons.

MULTI-LANGUAGE, MULTI-LOCATION, MULTI-CENTER

Multi-language, multi-location and multi-center are the standard features of FLP[®] Accounting Manager and no extra license fees are required for using these features.

HISTORIC FINANCIAL RECORDS ALWAYS ON-LINE

Since FLP[®] Accounting Manager does not require 'purging', you simply go to any 'cabinet' (i.e. any fiscal year) to search historical data.

EASY BACK-UP AND DATABASE REPLICATE

The advanced feature of 'replicate' allows database to be replicated to a back-up server at pre-determined time interval. In case where the main server does not function, you can switch over to the back-up server within minutes.

HOUSEKEEPING TOOLS

FLP[®] Accounting Manager offers a set of housekeeping tools. You can rebuild document access rights to each document after staff changes. You may clean up the temporary files.

APPLICATION PROGRAM INTERFACE
FLP[®] Accounting Manager API provides a set of routines and tools for third party developers to integrate their applications with FLP[®] Accounting Manager.

USING FLP[®]
You truly have used next generation technology in achieving today's business success.

FLP[®] BUSINESS MODEL

A FOUNDATION FOR YOU TO BUILD YOUR OWN BUSINESS MODEL

No two companies are the same even conducting the same business in the same industry. Why should you choose a standard software package.

No other software solutions provide more feature and functions than FLP[®] does costeffectively. No other software solutions provide such an all-in-one interface integrating with your company wide company business processes. FLP[®] provides a market leading collaboration platform for all your company staff to work on anytime, anywhere with unlimited scalability without physical country border barriers over the Internet.

What's more, FLP[®] shares our experience with you to customize the software applications to suit your business and prepare for the future.

FLP[®] is empowered by IBM[®] Lotus[®] Domino[®]/Notes[®] technology.
