FLP® HUMAN RESOURCES MANAGEMENT

HUMAN RESOURCES MANAGEMENT ONLINE

Human resources (HR) departments have traditionally been responsible for processes, such as payroll management, leave management, performance evaluations, benefits administration and to provide a central repository of employee-related information. Many of these processes require time-consuming efforts, HR staff finds it hard to spare enough time for other important strategic activities.

STREAMLINE HUMAN RESOURCES MANAGEMENT PROCESSES

The goal of FLP® Human Resources Manager is to streamline HR management processes by providing an online platform and self-service functionalities to allow entire workforce to access the HR information easily, encouraging employees and managers to do almost everything related to HR management on a self-serve basis, thus freeing HR staff from tedious routine work and lowering the HR management cost.

AS-A-WHOLE ALL IN ONE APPROACH

As-a-whole approach is adopted, HR information will not be scattered in different databases, servers and desktop computer harddrives. All HR related information will be kept in a single database and available online for timely retrieval, any information updated or newly entered can be made available immediately for reference by authorized personnel throughout the organization. This is critical for organizations with geographically dispersed branch offices as HR staff can efficiently manage a global workforce from a single location and align workforce with company goal.
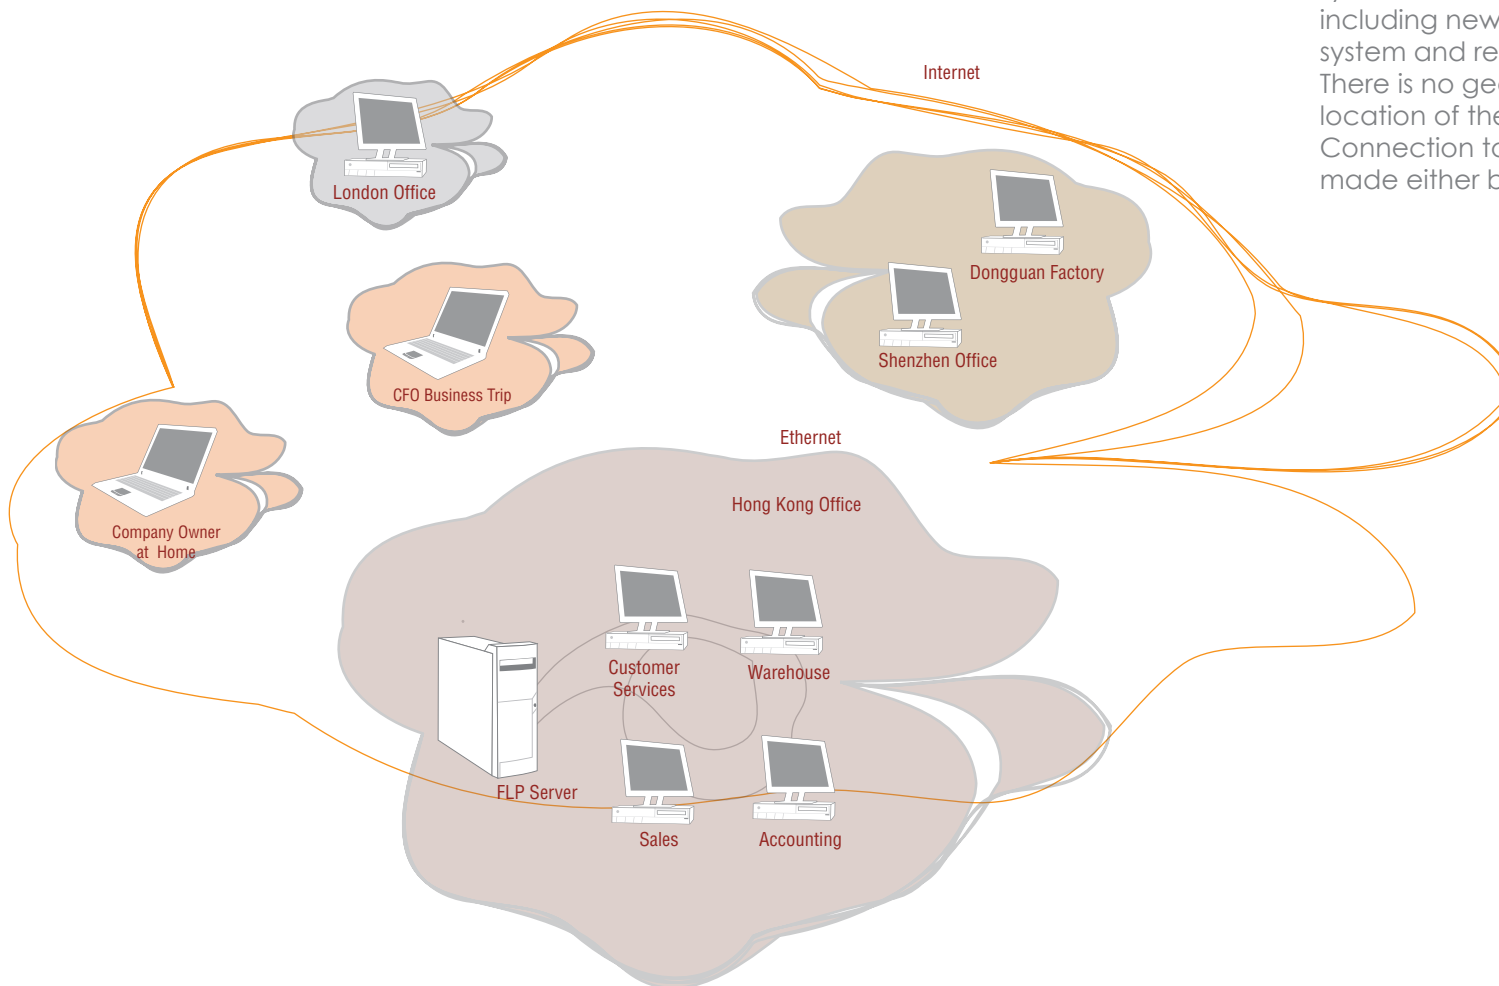

READY FOR CUSTOMIZATION

FLP® Human Resources Manager is ready for customization to address specific industry needs, and can readily be integrated with other FLP® solutions, for example, FLP® Document Manager and FLP® Accounting Manager, to form a real-time enterprise to raise the overall organization productivity. FLP® Human Resources Manager supports multiple languages and is equipped with sophisticated IBM security technologies to allow reliable multiple-user access.
